

Physics Notes & Labs Guide

How to Make Notes or Complete Labs in Physics:

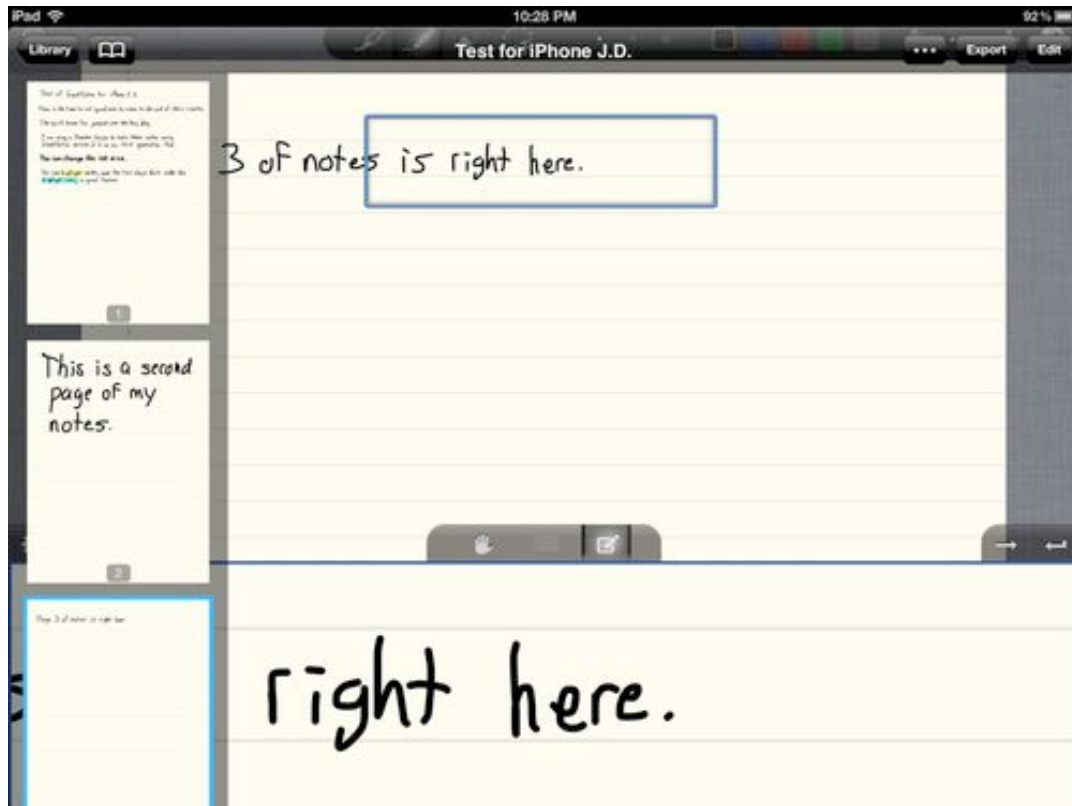

1. Go to the class website (www.flippedphysics.net) on your ipad.
2. Choose your course on the left sidebar and click it to go to the course page.
3. Find the topic we are currently studying -- every video has a topic.
4. Click the “Notes” icon for that topic, or the “Labs” icon if we’re completing a lab:

5. Once you’ve opened the document, click near the top right of the document; some buttons should appear.
6. Choose the “Open in…” button and select “Open in Notability”:

7. Take your notes (or complete the lab), ideally using a stylus. The ZOOM tool is extremely useful for taking notes. Please use it:

8. Notability should save your file automatically. Press this button on the top left to organize your files:
